DETAILED ACTION

Status of Application

1. The remarks, amendments, and Request for Continued Examination filed on 02/04/2011 are acknowledged.
2. Claims 1-116 were cancelled.
3. New claims 117-200 were added and are subject to an Election of Species requirement.
4. Please note that claim 191 is dependent on itself. For purposes of the restriction/election requirement, claim 191 was considered as being dependent on claim 190. Appropriate correction is required.

Continued Examination under 37 CFR 1.114

5. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, Applicant's submission filed on 02/04/2011 has been entered.

Election/Restrictions

6. This application contains claims directed to the following patentably distinct species.

Election of Administration Form:

- (a) Pharmaceutical dosage form that is a tablet (see claims 117-137, 139, 159-162, 164-170, 175-179 and 198-200)
- (b) Bi-layered Tablet (see claims 138, 140-158, 163, 171-174 and 180-197)

The species are independent or distinct because the different forms are distinct in the number of layers that are required for each dosage form (i.e., single-layered tablet versus bi-layered tablet). The different forms would result in varied properties, effects and results (i.e., distinct rates of release, dissolution profiles, etc.). In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, or a single grouping of patentably indistinct species, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 117, 159, 166, 140 and 180 are generic.

There is a search and/or examination burden for the patentably distinct species as set forth above because at least the following reason(s) apply:

Each of the distinct species claimed is capable of supporting a separate patent within the art. Each of the distinct species claimed would also require completely different searches in both patent- and non-patent databases, based on their different sub-classification and there is no expectation that the searches would be coextensive in scope. This creates an undue search burden upon the Examiner.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or a grouping of patentably indistinct species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species or grouping of patentably indistinct species, including any claims subsequently added. An argument

Art Unit: 1615

that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species or grouping of patentably indistinct species.

Should applicant traverse on the ground that the species, or groupings of patentably indistinct species from which election is required, are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing them to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
